Why AWS? The Cloud Revolution

Cost Efficiency

Replaces costly, upfront IT infrastructure with flexible, pay-as-you-go cloud services.

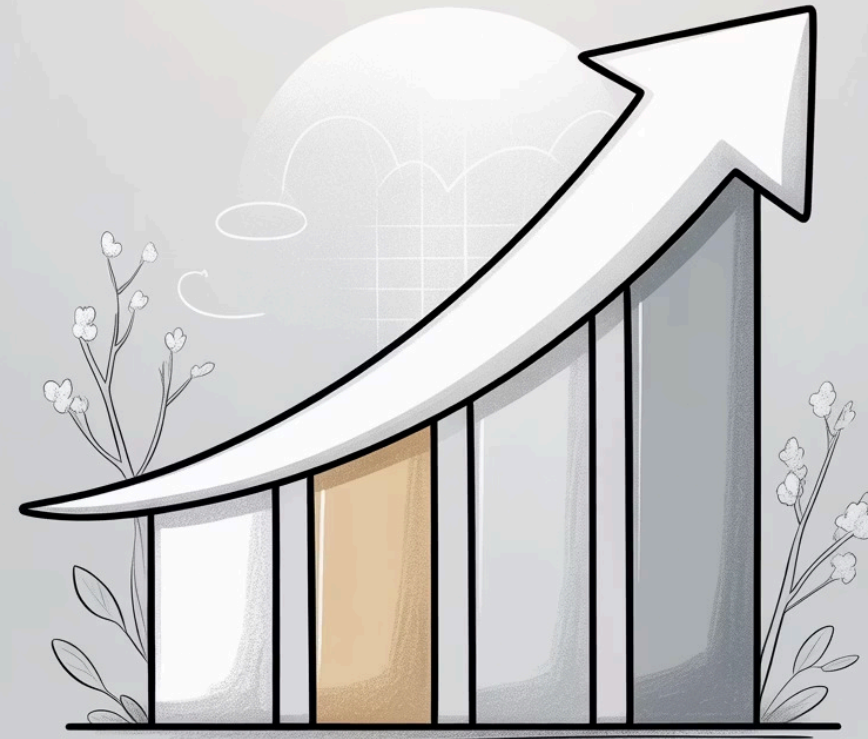

Instant Scalability

Enables businesses to instantly scale computing power and storage on demand.

Proven Success

Powers innovative startups like Airbnb and established giants like NASA.

CLOUD MIGRATION

AWS Global Infrastructure: Regions & Availability Zones

30+ Geographic Regions

AWS operates across the globe to serve customers worldwide with low latency.

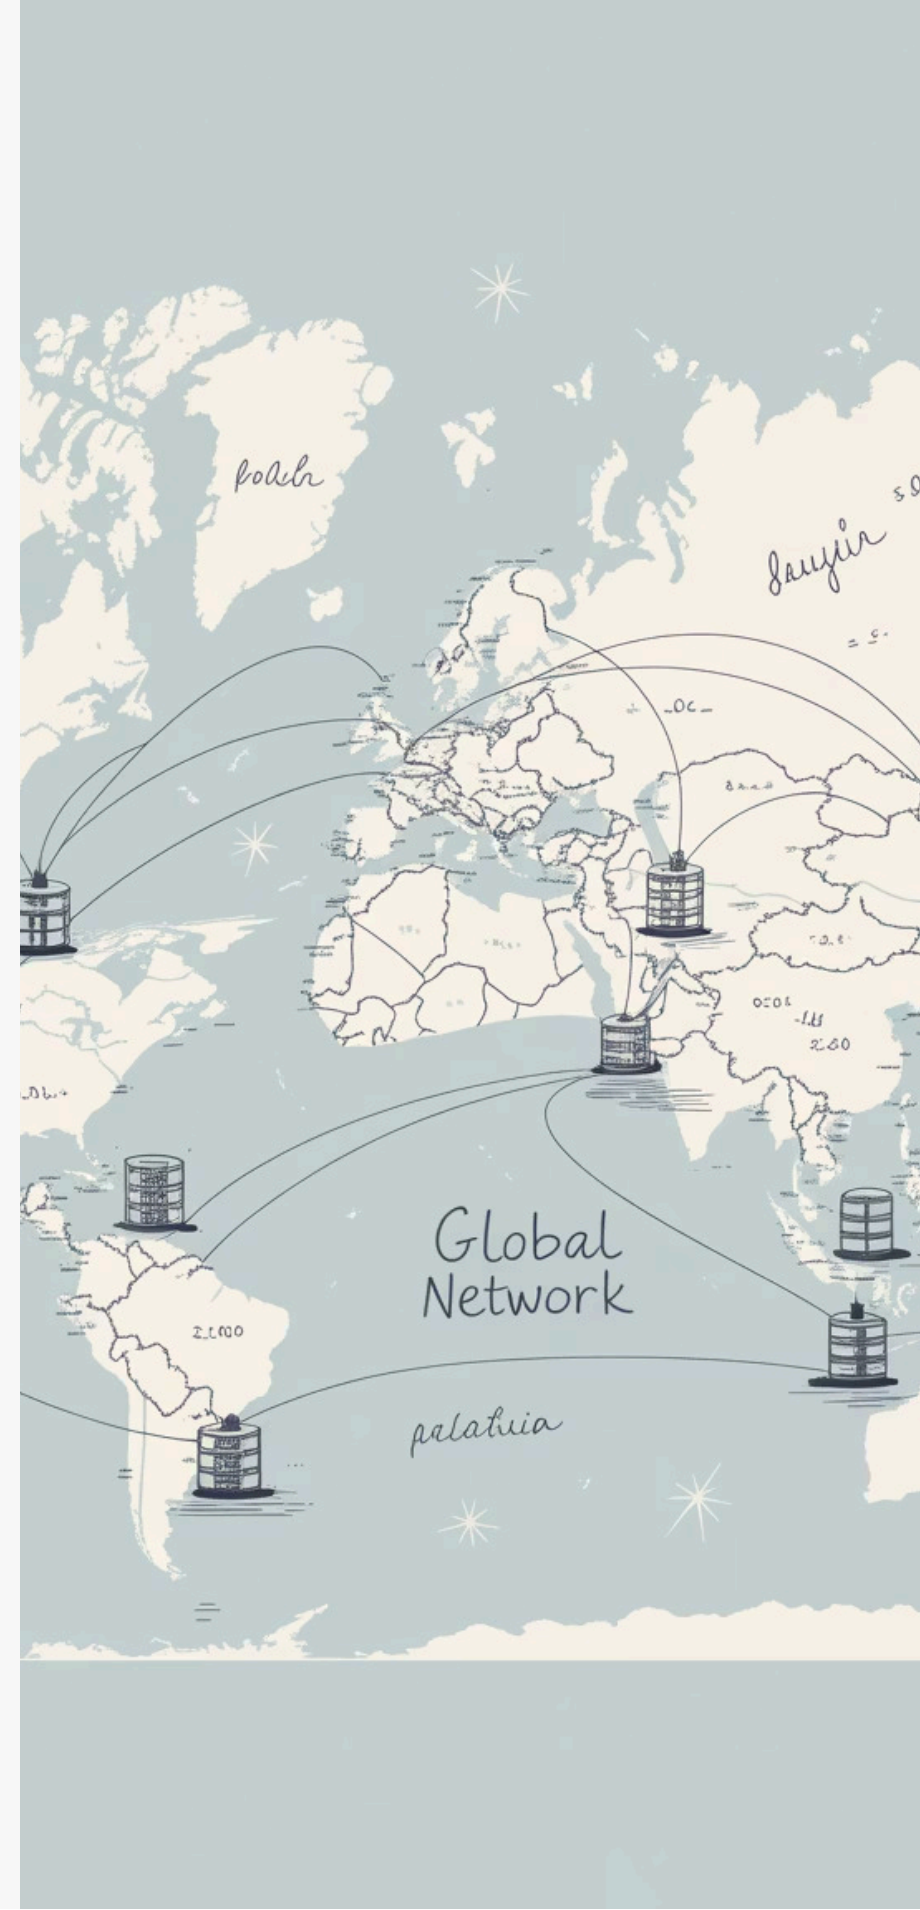

Multiple Availability Zones

Each region contains isolated data centres for high availability and fault tolerance.

Disaster Resilience

This global network ensures continuous operation and disaster recovery capabilities.

Core AWS Services You Should Know

1

EC2

Virtual servers to run applications with configurable computing power and operating systems.

2

S3

Scalable object storage for files, media, and data backup with 99.99999999% durability.

3

RDS

Managed relational databases supporting MySQL, PostgreSQL, Oracle, and SQL Server.

4

Lambda

Serverless computing to run code without managing servers, paying only for execution time.

How AWS Makes Your Life Easier

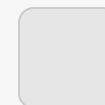

Unified Management

AWS Management Console controls all services in one intuitive interface, simplifying cloud operations.

Built-in Automation

Tools like Auto Scaling and Load Balancers ensure reliability and performance without manual intervention.

Enterprise Security

Security built to meet military and global banking standards with 300+ compliance certifications.

Real-World Impact: AWS in Action

Netflix

Streams billions of hours globally using AWS compute and storage infrastructure for seamless entertainment delivery.

NASA

Processes massive satellite datasets and conducts scientific research using AWS's powerful computing capabilities.

Growing Startups

Scale rapidly from idea to millions of users without upfront hardware investments or infrastructure complexity.

Cost Control & Free Tier

AWS Free Tier

Limited free usage to explore services without charges for 12 months.

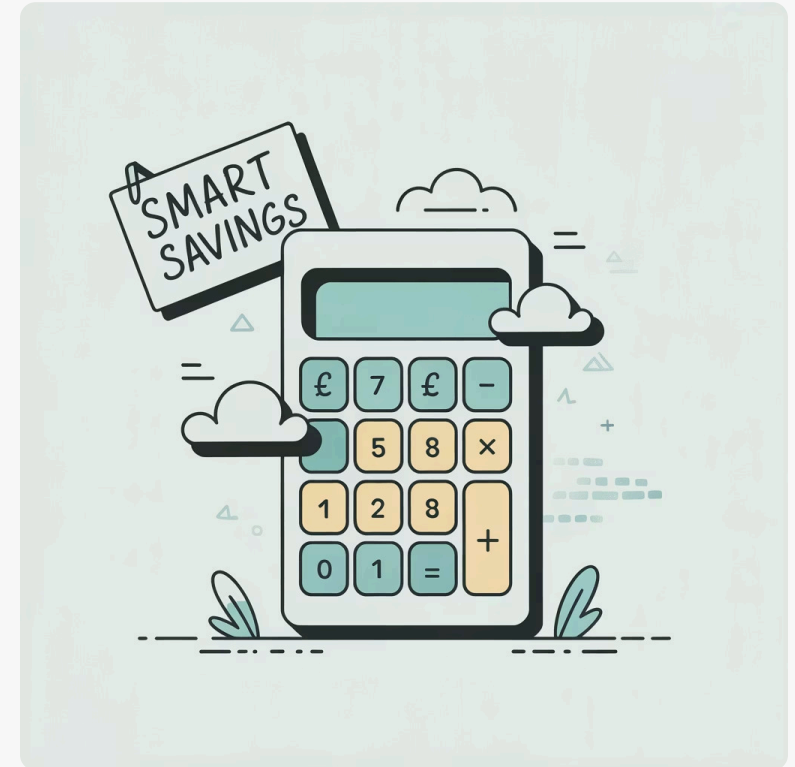

Pay-As-You-Go

No upfront costs or long-term contracts — pay only for what you actually use.

Budget Management

AWS Budgets and Cost Explorer help monitor and control spending with alerts.
